

UP 65

strong and flexible

Features

Technical data

150 kN Crimp Force | Electrical connection 230 V, 50 Hz

High-quality

Linear crimping motion provides high process quality and is an ideal choice for automotive and industrial applications

Application range

Uninsulated contacts up to 300 mm² | Insulated terminals up to 300 mm² | Automotive connectors up to 120 mm²

Process-optimized

Contact hold function through programmable return stroke with 30 memory settings, adaptable to your processing requirements

Monitoring in real time

Crimp force monitoring available as an option

Flexible

React to different production orders with tool-free quick-change adapter system

Light

With 145 kg compared to other machines a lightweight, compact design, hydraulic aggregate integrated

Reliable

The production quantity is recorded by the electronic piece counter

Programmable

2 user interfaces (Setup | Production), lockable

Individual

Different adapters allow almost unlimited variability for individual customer solutions (use of external dies possible)

Varied

A selection of standard processing solutions with and without positioning system available from stock

Process-safe

Forced sequence control provides additional process quality

User-friendly

Safety or two-hand operation optionally available

Well-known

"WDT" is established as a strong brand in the field of cable processing for decades

Customized

Customized versions in design and function are available on request

Reliable

Quality Made in Germany and CE compliant
